

VANAPILLI SUCHIT

Artificial Intelligence And Machine Learning Student | Graphic Designer | Frontend Developer | Prompt Engineer
Srikakulam, Andhra Pradesh, India | +91-9494710751 | suchitvanapilli25@gmail.com
[LinkedIn Profile](#) | [GitHub Profile](#)

PROFESSIONAL SUMMARY

AI & ML student with hands-on experience in frontend development, UI/UX, and graphic design. Skilled in Python, JavaScript, HTML, CSS, React, MongoDB, and AI/ML concepts. Passionate about building responsive, user-focused solutions and applying technical skills to real-world projects.

TECHNICAL SKILLS

Languages : Python, Java, SQL, C
Web : HTML5, CSS3, Tailwind CSS, React.js, Bootstrap
Core : OOPs Basics, Data Structures, Problem Solving
Design : Figma, Affinity, Premiere Pro, Canva
AI & Tools : ChatGPT, Gemini, Git, GitHub, VSCode, Other AI Tools
Languages known : Telugu, English

PROJECTS

Face Recognition System (GitHub)

- Developed a real-time face recognition system using Python and computer vision to detect and identify registered users through a camera.
- Integrated a database for user registration, authentication, and secure management of recognized user information.
 - Designed a user-friendly interface for seamless interaction and real-time recognition results.

Railway Reservation System — Mini Project (GitHub)

- Developed a responsive railway booking system with authentication, train search, passenger management, and berth selection.
- Implemented 5-step booking, PNR/live train status, cancellations, booking history, and ticket management.
 - Built interactive coach/berth selection and railway wallet using HTML, CSS/Tailwind CSS, and JavaScript.

Food Sea – Food Delivery App UI/UX (Figma Prototype)

- Designed a complete food-delivery app interface in Figma, including restaurant discovery, categories, search, cart, checkout, and order tracking.
- Designed intuitive user flows for location management, payments, OTP verification, offers, order tracking, and support.
 - Developed a consistent user-centered interface and visual design system with intuitive navigation, clear food categorization, personalized offers, and streamlined ordering experiences.

EDUCATION

B.Tech – Artificial Intelligence And Machine Learning | Sri Sivani College Of Engineering (2024 – 2028)

Intermediate (MPC) | Sri Chaitanya Junior College (2022 – 2024)

SSC | Municipal Corporation High School Balaga (2021 – 2022)

CERTIFICATIONS

Credly Profile : <https://www.credly.com/users/suchit-vanapilli>

- **Introduction to Generative AI with Snowflake** certification in collaboration with Snowflake and GeeksforGeeks.
- Participated in a **Data Structures and Algorithms Hackathon** organized by Brainovision, gaining practical exposure to problem-solving, algorithmic thinking, and coding challenges.
- **2-Day Hackathon – Achievement & Participation** | Google Student Ambassador Program, Sri Sivani College of Engineering (September 2025)
